Introduction

In this world of violence and chaos, more than ever, we need to find the power to create our own unique environment that we call “our zone of safety”. Not that it is easy to do, however, it is much more achievable than we ever realized. Look at how scared to sacred is just switch of two little letters.

When we do not give power to the lesser elements in our own life or in the lives of others, we can create whatever we want, with no limitations. We keep our mental eye singly on what we wish our life to be. We have a greatness within that is stored, just waiting to be charged and manifested.

We must not deny any adverse conditions because that is to continue a perpetual mental warfare with those very things our mind is trying to destroy. However, when we face the challenges head on, we then have a greater capacity to expand our awareness and potential to secure our goals. When we believe that failure is not an option, our greatness within becomes activated. We bring forth the empowerment, capacity, ability, understanding and determination that can, and will bring success. It may take us several ways, roads and avenues, but in the end, we will know that we are already powerful in our own right.

Whatever we fear becomes our mantra. Therefore, we must utilize our fear to catapult us to another consciousness and awareness. Fear can often be a wisdom and this wisdom is extremely important to our survival and success. On the other hand, if we stay stuck in fear, with no exit plan, it becomes our paralyzer and defeat.

To create our own zone of safety, we must first acknowledge our fears. These then must be used as the foundation to a new, calmer and more successful way of living. Owning our vulnerability, fear and weakness is the primary step towards, empowerment, courage and strength. Through this, undesirable conditions will be counteracted and removed before they can advance any further.

We can use our fears as a way to become healthier, wealthier, and enlightened. Our superior self comes flying out like a dragon and roaring like a lion.

Exercise Three
Glory for the SPIRIT
moving to a more **EXALTED** life

Because we dwell in a world of lower dimensions, with so much chaos, embracing the unseen, spiritual world helps us cope with the problems and challenges of everyday life.

Unseen forces are extremely mighty. However, if we do not believe in them, they have no place to do what they are here to do and help where they are yearning to help. Their job and mission is to keep regenerating the 'light', wherever darkness has intervened.

Every minute, every decision, every action we take is a choice we make. We can decide to believe or not believe, take the easier road or learn the hard lesson, go for the light or fall for the dark. **THE CHOICE IS ALWAYS OURS.**

There is a reverence in believing in the higher forces. The Universe is always available to help us get through trying times – but do you believe that?

Spiritual Forces

Creation is made up of two components, the physical and the spiritual. The physical is perceived through our senses. However, the spiritual cannot be detected with our senses, nor through technology. It is felt through our souls.

Do you **believe** you are alone in this world or are there are spiritual forces there to assist you? If yes, how do they appear in your life? If not, are you willing to expand your awareness and consciousness?

Angels

Angels are celestial intermediaries between heaven and humanity. They serve as protectors, guides and are also powerful messengers. We all have a guardian angel or angels that are here to help – we just have to pay attention to them.

Do you **believe** in angels? If yes, how do they appear in your life? If not, are you willing to expand your awareness and consciousness?

Higher Power

Our higher power is the bridge between our conventional physical realm and the unconventional universal realm. It catapults us to our rightful place because it holds a unique intelligence. We all have a higher power – we just have to acknowledge it.

Do you **believe** in a higher power? If yes, how does it work in your life?
If not, are you willing to expand your awareness consciousness?

Divinity

Divinity is the union of our human and heavenly nature, whereby our personality and soul walk hand in hand. Divine planning holds the vision of wonder and wellness, which enraptures hope and harmony.

We are all divine – we just have to know it.

Do you **believe** in a greater divine plan for yourself? If yes, how? If not, are you willing to expand your awareness and consciousness?

Exercise 4

Closing Exercise

1. What do you feel you learned from this guide that you will incorporate into your life?

2. Which exercise did you like the best and why?

Summary

When putting out an intention to build a zone of safety, there will be a fuller measure to our life than we could have ever expected. We are all important, and we all have the ability to infuse our world and universe with reverence. The invisible world, before the great wave of materialism engulfed us, used to be regarded as a source of all living.

When we create conditions for the purpose of respect and safety, we provide recuperation for all that is ill or ill-mannered and we recharge it with a steady increase of vigorous power for a healthy state of being and living.

Having an intention be a vehicle of safety for ourselves becomes a spiritual force that will benefit others and infuse evolution. Acceptance for what we cannot change is the first step in creating what we can change. They are integrating principles that empower our psyche. We take responsibility for helping the world by helping ourselves. We inject and perpetuate a sacredness into the atmosphere by creating a sacredness in our own environment, both internally and externally.

When we live the upper story of our minds, form space for a healthier body and focus spiritually on the magnificence of the unseen forces, we bring to the commonplace a quality and worth of heaven that the world simply cannot destroy.
