# Introduction

Love is the most important aspect of our human existence because it keeps the heart beating. Yet, unfortunately it is what is missing most in leadership roles. Our world is crying for openhearted leaders with solid solutions. When we examine the statistics concerning all the innocents in the world, such as children, animals, the elderly, the environment, we witness the void of heartfelt feelings. We hear more of trials than triumph and hopelessness than happiness.

Yet, we have the power to change these statistics. Solutions can be realized through each and every one of us making an effort to stabilize and ignite our own individual heartfelt goodness. If we create a world unto ourselves, whereby we make a commitment to infuse caring into every minute of our journey here, we will indeed see our global situation transform with us. This kind of loyalty to ourselves instigates a change in our way of thinking, our way of being and our way of leading. We will then no longer accept things in our space that do not serve our highest good, and we will no longer let our hearts go unconscious.

Senses are needed for sincere leadership. They are sensitivity, sensibility, common sense and sense of responsibility. When we lead coming from a place of our heart, we experience a sense of fulfillment for ourselves that goes way beyond what we can see and feel. When we lead coming from a place of our ego, we experience a sense of loss for ourselves that also goes way beyond what we can see and feel.

Largehearted leadership is found in our ability to handle problems with grace, compassion and intelligence. Leaders of this kind believe in generosity over greed, good over evil, truth over lies, and fairness over injustice.

## Leadership Tips

Leading through our own innate goodness is the first seedling of a miracle. It matters not what the end result is, it only matters how we took the journey. The road to success, in however we view success, is always under construction. We are here to listen and learn, then share those jewels with others. Compassion is the most revolutionary agent of all. In truth, materialism is just a means by which we are tested. By and large, people do not care how much you know until they know how much you care. Leading this way transforms the lowest into the highest, humbles the most proud, and infuses darkness with light.

This alone creates an intrinsic self-worth which defeats all depression and failure. It is the most valuable aspect in ensuring a lifetime of peace. We stay true to the commitment for our soul's survival because our values are the veneration of our character. Through this devotion, we become steadfast and strong. In turn, we become the difference that makes the difference. In truth, our values are truly the most valuable possessions we can have.

Being aware of our values is a significant step to successful leadership. All of us dream of life being different, the world being a safer place and having more success in our life. ## Exercise 4

### What is True?

#### True Happiness

When we love what we do and who we are, marvelous things follow. It is the law of the Universe. It is not what happens outside of ourselves that shapes our life, it is what happens inside of ourselves that shapes our lifetime. So no matter what we are involved in, large or small, the most important thing is to have the time of our life doing it. Make a commitment to accept each day with a grand, loving heart. The art of **true happiness** is birthed from the art of self-love.

#### True Wealth

It is not what we do that counts; it is how we do what we do that matters. Livelihood was meant to mean “lively-hood”. We must train ourselves to view our day to day life as a cultivation of our character. Dignity is not connected to finances as most people think. It is our birthright and we must defend it throughout our life, in all our relationships. **True wealth** is not about money, it is the reward that flows from our hearts and follows us into infinity.

#### True Power

To be happy or sad, to be inspired or bored, to be determined or lethargic is always a conscious choice. It is so common place to blame our problems on others. We always have the power to change our situation or at least how we perceive our situation. We are not as powerless as we think we are. Every moment of our day is filled with something or someone inviting us to further develop ourselves. **True power** is experienced most when we see and validate the success hidden in our failure.

## True Freedom

Freedom is seeing our mistakes as opportunities for growth and not caring how others perceive us. We need to take ourselves seriously, yet be able to laugh at our blunders. A great master once said; “The highest form of spirituality is laughter.” It is the almighty anti-depressant. When we come to realize that even the dullest task can be filled with delight and even the most challenging situation can be seen as stimulating, it is then, no matter what the circumstances, life can be exciting and exhilarating. **True freedom** is doing the best we can and feeling at peace to leave the rest to the unseen forces.

## True Success

People make decisions that are cold, greedy and calculating, using the excuse that there are different rules for business. This is a ridiculous man-made statement that holds no credence or virtue. The only way to everlasting peace is through our open-heartedness and open-handedness. Money has no importance in heaven, yet heaven never ignores how well we loved and how generous we were during our lifetime. Love has intrinsic value to **true success** because it is the only thing that makes life worth living and truth be told, nothing endures long without it.
